

# Assignment 3: COIL project reflection

1. What were the 3 most important lessons you learned from this collaborative project about migration or about Kyrgyzstan? As much as possible, try to relate to lessons learned in class (assigned readings, videos, databases, class discussions, assignments, etc.)
2. What works and what did not work? What were specific challenges that you faced?
3. How did your cultural background influence your understanding of global migration and shape your interaction with your partner(s)?
